As supplemental information, we are providing non-GAAP performance measures that we refer to as Economic Earnings and Economic Earnings per share ("Economic EPS"). We provide these measures in addition to, not as a substitute for, net income and earnings per share, which are reported on a GAAP basis. Management reviews Economic Earnings and Economic EPS to evaluate Westwood's ongoing performance, allocate resources, and review dividend policy. We believe that these non-GAAP performance measures, while not substitutes for GAAP net income or earnings per share, are useful for management and investors when evaluating Westwood's underlying operating and financial performance and its available resources. We do not advocate that investors consider these non-GAAP measures without also considering financial information prepared in accordance with GAAP.

We define Economic Earnings as net income plus non-cash equity-based compensation expense, amortization of intangible assets and deferred taxes related to goodwill. Although depreciation on fixed assets is a non-cash expense, we do not add it back when calculating Economic Earnings because depreciation charges represent an allocation of the decline in the value of the related assets that will ultimately require replacement. In addition, we do not adjust Economic Earnings for tax deductions related to restricted stock expense or amortization of intangible assets. Economic EPS represents Economic Earnings divided by diluted weighted average shares outstanding.
